## LAPORAN

# PENGOLAHAN CITRA DIGITAL

Pertemuan: 10

## **TUGAS**

NAMA : SYAHRUL FIKRI

NIM : 1207070121

KELAS : TKK

HARI, TANGGAL: Kamis, 18 Mei 2023

WAKTU : 13.00 – Selesai

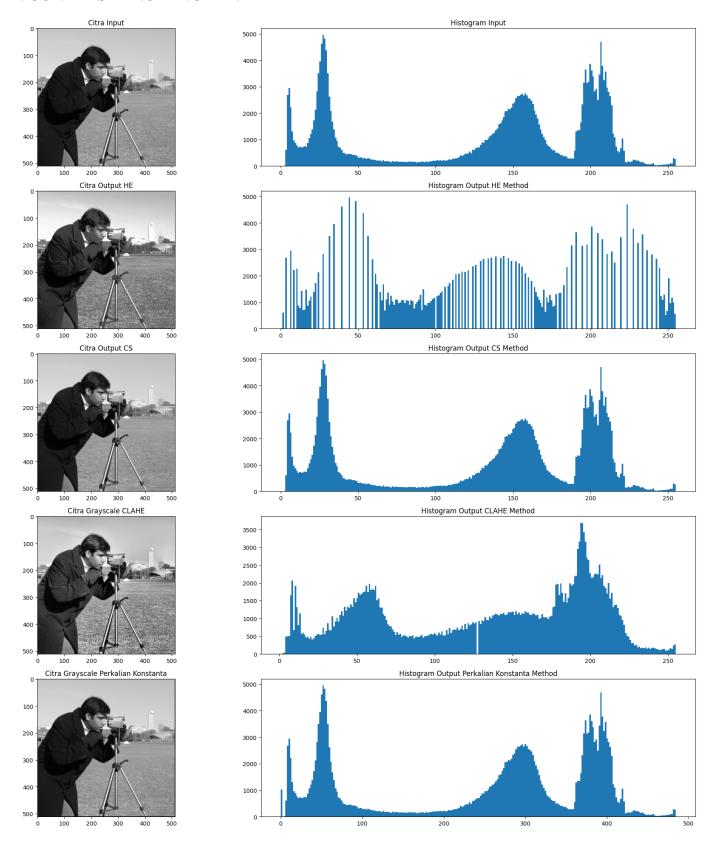

DOSEN : RIN RIN NURMALASARI, S.Pd., M.T.

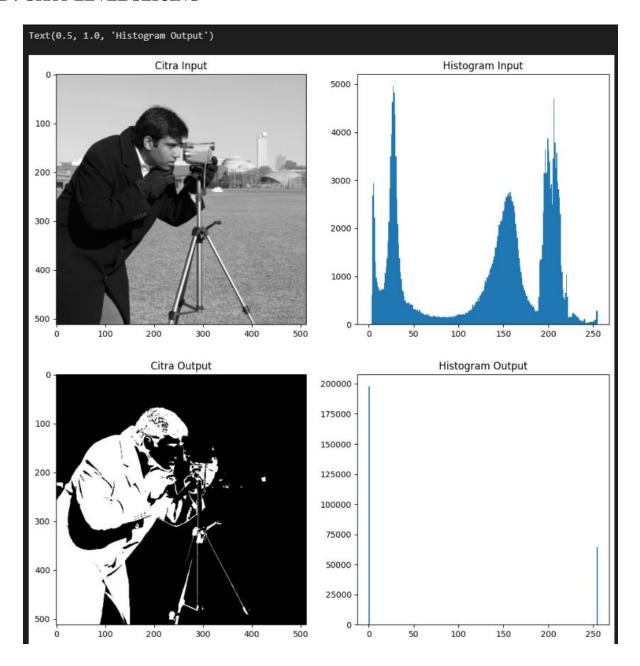

# TEKNIK ELEKTRO FAKULTAS SAINS DAN TEKNOLOGI UIN SUNAN GUNUNG DJATI BANDUNG

2023

## A. CONTRAST ENCHANCMENT

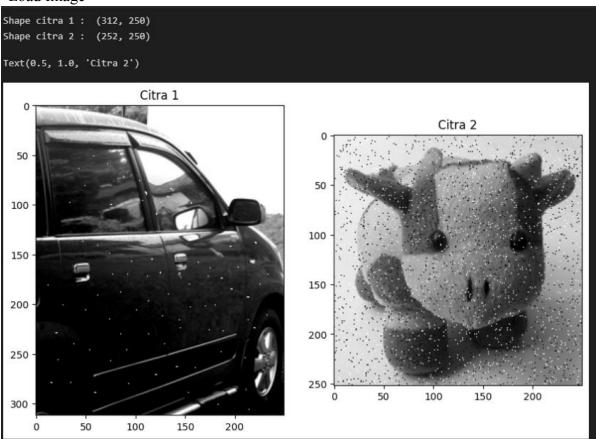

## **B. GRAY LEVEL SLICING**

## C. FILTER RERATA

"Load Image"

#### "Variable Output"

```
Text(0.5, 1.0, 'Output Citra 2')

Shape copy citra 1 : (312, 250)

Shape output citra 1 : (312, 250)

m1 : 312

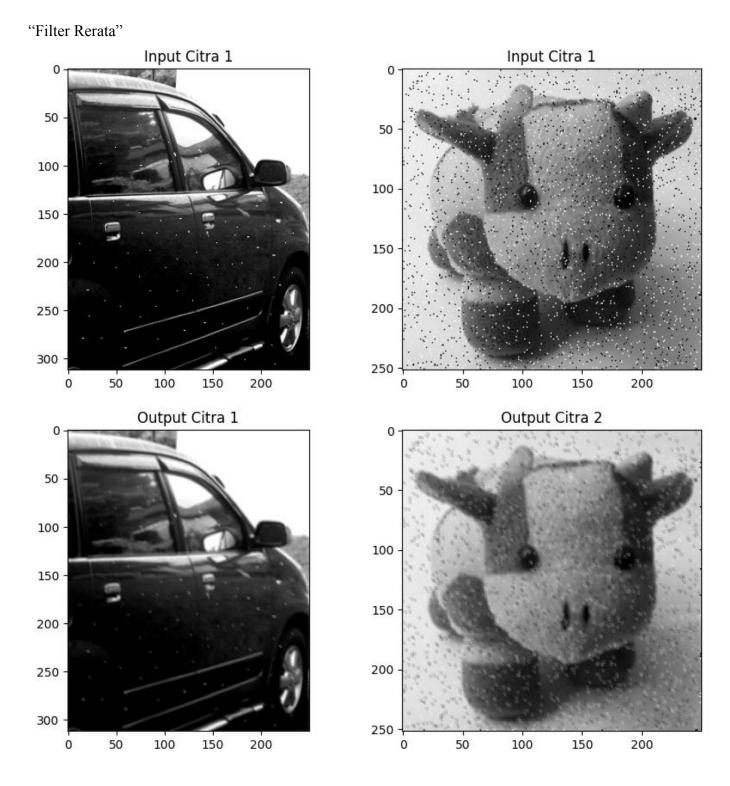

n1 : 250

Shape copy citra 2 : (252, 250)

Shape output citra 2 : (252, 250)

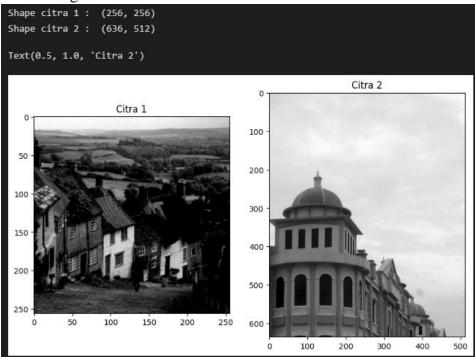

m2 : 252

n2 : 250
```

## **D. FILTER MEDIAN**

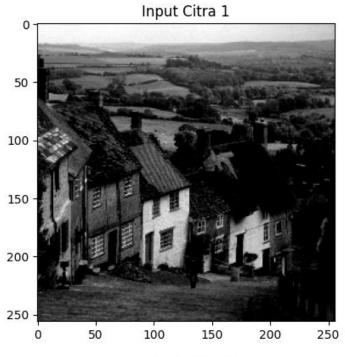

## "Load Image"

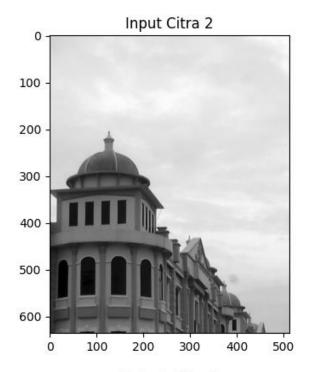

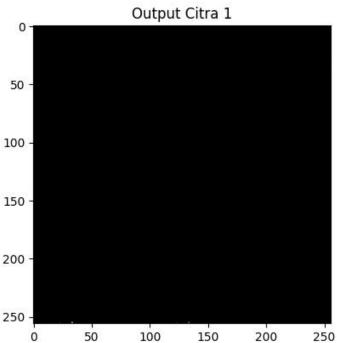

## "Variable Output"

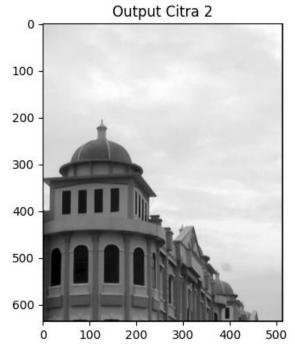

```
Shape copy citra 1 : (256, 256)
Shape output citra 1 : (256, 256)
m1 : 256
n1 : 256
Shape copy citra 2 : (636, 512)
Shape output citra 2 : (636, 512)
m2 : 636
n2 : 512
```

"Filter Median"

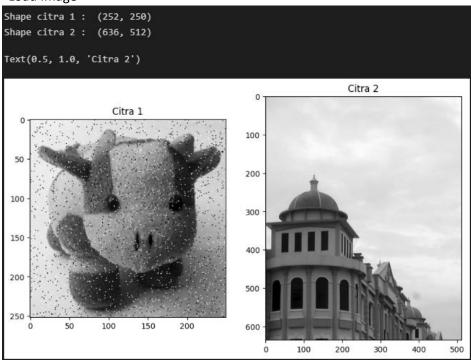

## **E. FILTER BATAS**

## "Load Image"

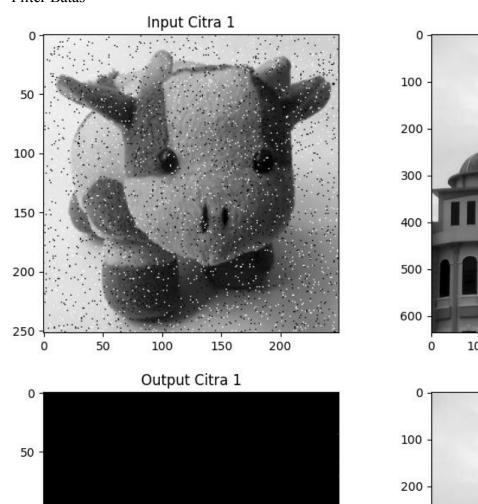

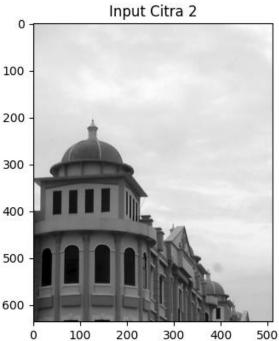

## "Variable Output"

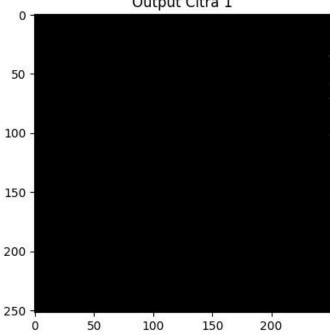

```
Shape copy citra 1 : (252, 250)
Shape output citra 1 : (252, 250)
m1 : 252
n1 : 250

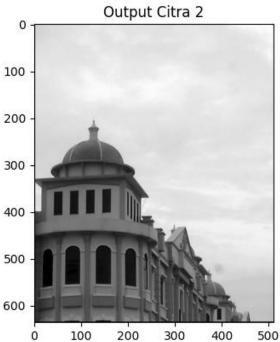

Shape copy citra 2 : (636, 512)
Shape output citra 2 : (636, 512)
m2 : 636
n2 : 512
```

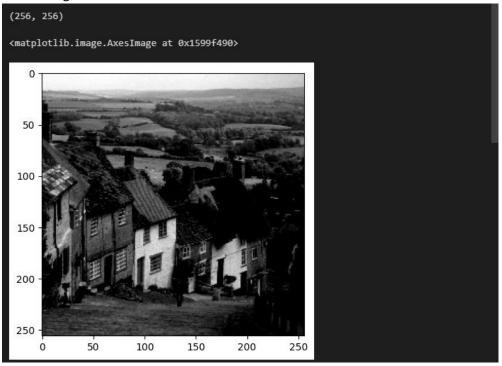

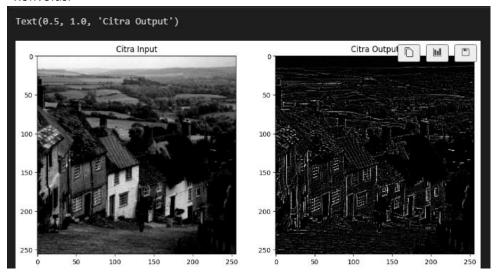

## F. KONVOLUSI

"Load Image"

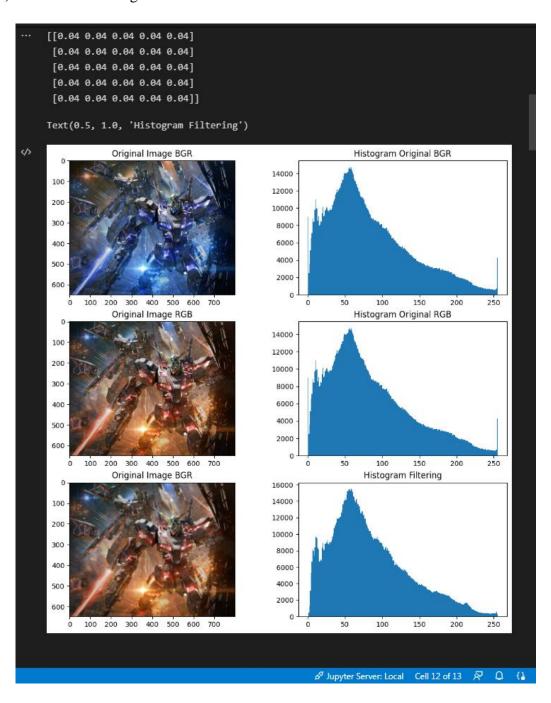

## "Konvolusi"

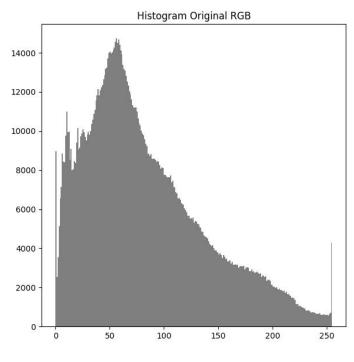

## G. IMAGE FILTERING LPF, HPF, DAN THRESHOLDING

(1) Low-Pass Filtering

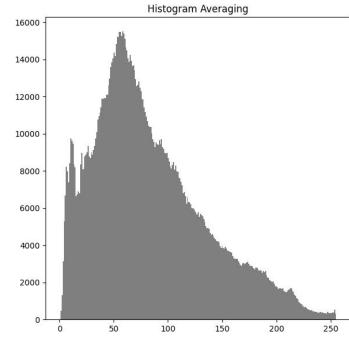

"Averaging"

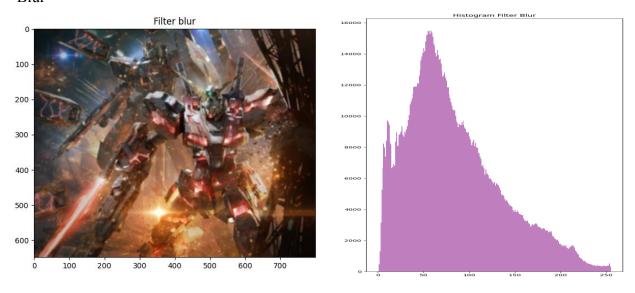

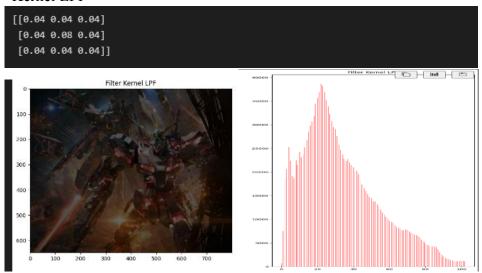

## "Blur"

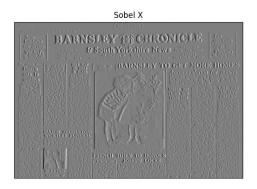

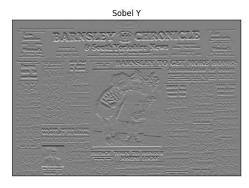

## "Kernel LPF"

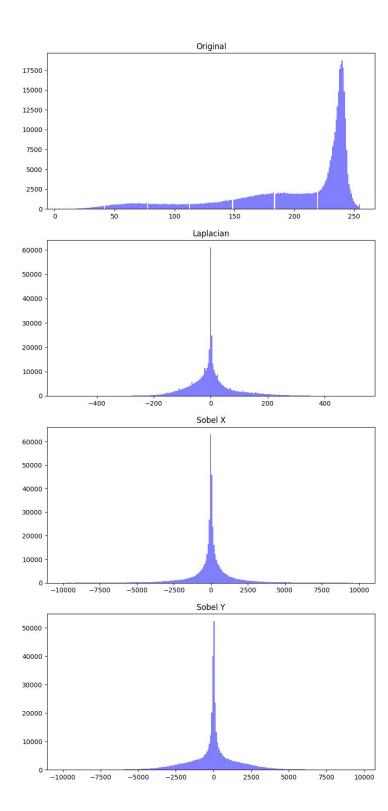

# (2) High-Pass Filtering "Laplacian"

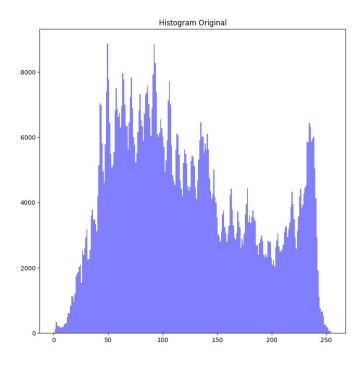

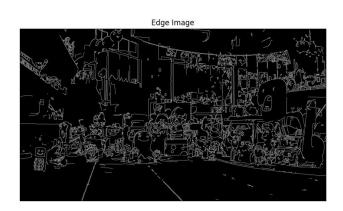

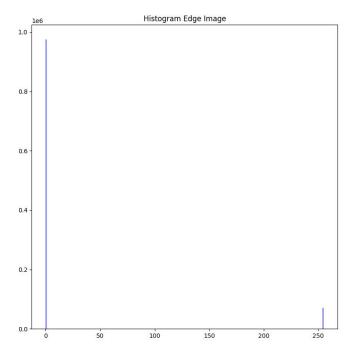

"EDGE"

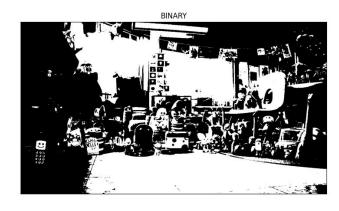

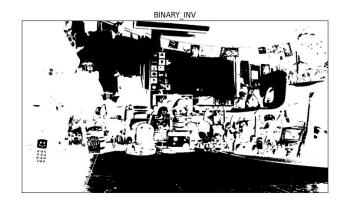

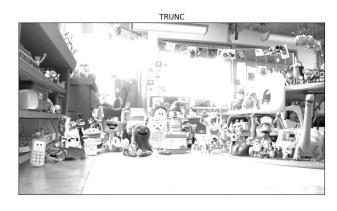

# (3) Thresholding "Global Threshold"

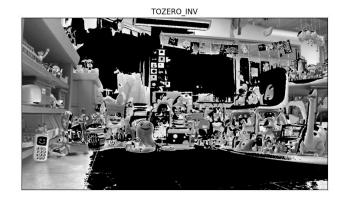

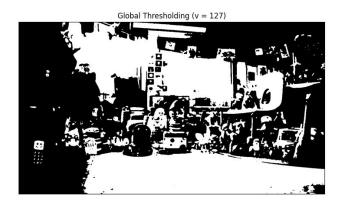

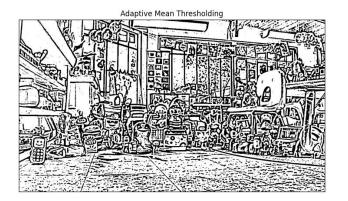

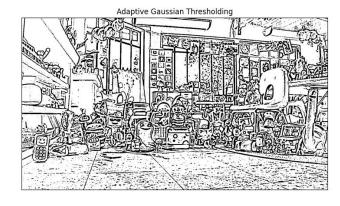

# "Adaptive Threshold"

#### H.TUGAS

1) Resume Image CLAHE

Contrast Limited Adaptive Histogram Equalization (CLAME). CLAME adoloh greneralisasi dani metale Adaptive Histogram Equalization (AHE). Metade in mampu menyharolka cotra you letih baik distandingtion degan creme asti yong bein deproses. Berkeda dergen He yay belierga secono global, algoritme CLAHE membagi atra he dalam area-area Young labor hacil den movemplean. He un tale mosing-mosing area tersebut. Algorit me CLAHE apot dijelashan Sebagai beilet: a. Citra as l' dibagi merja di sub citra yang berdunan 6. menghi tung histogram der setup sub-citre. a dipped histogram dan setup citra. Jumlah pilese! pada sub citra dids tribusi pada meson - ma avoy denogat bookean pata- rater jumlah prise! pada schiap derajat heakan dinimerkan pada persamaan Mang = Mer-up x Mer-yo
Mgray Variabe / M menyatekan loss regon size. M menyatakan miles grayscole (28%) dan & merupaken alip politon menya takan perombahan betes limit snatu hotogram yang berniloi antera O sampai 100. Histogram diotas milai clip limit dianggar helebihan lexcess) prheel yang alian didistribusilian hepola area selectar debauch clip limit selvinga histogram

Permosalahan pengleatan kentras yang berlebihan pada

AHE dapat diatasi dengan menggunahan Contrast himited

Adaptik Histogram Equalization (CLAKE), yaitu membenikan

Nelai batas pada histogram. Milai batas in disebut dengan

elip limit yang menyatakan batas makanum tinggi suatu

histogram. Caro menghitung elip himit suatu histogram depat

dideprosisikan dengan mersamaan.

B= 1 (1+ al (snox -1))

Morabel M menyatahan lass region size. M menyatahan Man greyseale (256), menupakan clip koktor menyatahan Menambahan batas limiz dianggap belebihan (excess) piksel yang ahan didas tribusihan bepada area sekitar dibunah clip limit, sehingga histogram mereta.

Metode run length mempolen telenik elestelesi can degan menjanakan pendekaten statustik. Metode in menjanakan degan dis britusi suatu pihsel dengan intensitas yang sama, secara beruru tan dalam sater arah tertentu selajai primi trenya Masing-mening primutur didepunsikan atas arah, panjang, dan level beabuan Payang dari primitirak telestun hada arah yang berbede dapat digunakan centerk mengambakan suatu teletur: Cay Level Para Length motrily letter mempahan suatu bempulan leeterun tan piksel pada vibi gray lerel yang samai

Contohnya untuk memperbaiku tempilan malitas estre pada hesil em X-Ray.

#### 2) JAWABAN PERTANYAAN MODUL

Pertangoon 1: (LPR) Mengana hasil plotting bentet warnenged are your renter dilakahan untuk mengharehanya? =) Jamos: learna gambon hasil pilter 2 pp rentary prihaelage terlangua jach dan intensites pixel kedika sebelum dipersesar ukurango. Until memperbailunga maka Se trap pixel depat dele alken denjen honstanta agan menyesuarhan intensitas pixelnya Lenga uleuran lebat Lan tryginyo. Perforgan 21 (Averaging tolter) Seperti rango, hernel pada polter beselvet debuot agan selvach priesel gang bertetagge dehanege nelainga. Kra- him aps hegurean darr soften seperts in ? apa benjaruh wheren pilter prede hast placing tersebat? = Jama bi Pilter in: adelak un tek mengewangi noise yang tendapak pade gamber Penganh whereon poler (maske) pode hospit politicas apatria semation becambertantologia
